PROFESSIONAL SUMMARY

Cybersecurity student with hands-on IT support experience and foundational knowledge of security monitoring, threat detection, and incident response. Skilled in phishing detection, network traffic analysis, and vulnerability identification using SIEM platforms, Wireshark, and Nmap. Pursuing a Bachelor's in Cybersecurity and actively earning the Google Professional Cybersecurity Certificate, with strong attention to detail and eagerness to support secure digital environments.

EDUCATION

Nigerian University of Technology and Management (NUTM)

BSC, Cybersecurity

2024 - 2028

Lagos

Sacred heart day secondary school, Adikpo, Benue State

Secondary School

2018 - 2024

Adikpo, Benue State

CERTIFICATIONS

- Google Professional Cybersecurity Certificate (Ongoing)
- Completed Course 1 and received certification
- Federal Government of Nigeria (NITDA) – 3MTT Cybersecurity Certification (2025)
- Hack & Fix Certified Phishing Prevention Specialist

WORK EXPERIENCE

FAS Agro Nigeria Ltd

Jun 2024 - Oct 2024

IT Help Desk (Part-Time)

- Implemented endpoint protection and identity and access management controls, resolving user access issues and enhancing system security
- Configured firewalls and performed system hardening during installation and configuration of computer systems and applications
- Guided users in identifying suspicious emails and phishing attempts, escalating incidents according to incident response procedures
- Documented technical security issues and updated security policies and procedures for future reference

SKILLS

- **Security Tools:** SIEM Platforms, Wireshark, Nmap, Firewalls, Endpoint Protection
- **Cybersecurity Skills:** Phishing Detection, Threat Analysis, Network Traffic Analysis, Security Incident Investigation, Vulnerability Identification, Understanding of attack vectors, Basic operating system, Basic web app pen testing, Incident Response
- **Security Governance:** Security Audits, Compliance Reviews, Security Policies, Security Procedures, Identity and Access Management, System Hardening
- **Programming Languages:** R, C++
- **Cloud & Deployment:** Vercel, GitHub, Google Cloud Tools, AWS
- **Office & Productivity Tools:** Microsoft Word, Microsoft Excel, Microsoft PowerPoint, Microsoft Access, Google Workspace
- **Soft Skills:** Creativity & Problem-Solving, Team Collaboration, Public Speaking, Attention to Detail, Customer Orientation, Adaptability

CYBERSECURITY PROJECTS & LABS

Cybersecurity Projects & Labs

<https://drive.google.com/drive/folders/1POsRAOYAekmuS7ypSHRFFB7YIwv80XNz?usp=sharing>

- Completed multiple cybersecurity labs and investigations including:
- Completed The Gauntlet – Arctic Howl CTF challenge to practice offensive security techniques, exploit identification, and attack vector analysis
- Performed network scanning and enumeration with Nmap to identify open ports, services, and potential vulnerabilities
- Analyzed network traffic using Wireshark to detect anomalies, emerging threats, and suspicious payloads
- Investigated security events and alerts in SIEM platforms to support incident response and threat detection workflows
- Detailed lab reports and investigations are documented in a personal research drive. link below

LANGUAGES

- English (Proficient in oral and written communication)
- Other Nigerian Dialects (Conversational ability in multiple local languages)
